# Become a Scientific Assistant

Unlock your potential and expand your skills

Are you ready to excel at the intersection of Management, Business & Information Systems and Computer Science? Join our program and become a skilled Scientific Assistant!

Professional Qualification: Double Degree Management and Information Technology (M.Sc.)

This interdisciplinary approach equips students with the necessary knowledge and skills to excel as scientific assistants and contribute to research advancements in the field of Business Informatics. Through a unique combination of business and IT knowledge, students acquire a diverse skill set that forms a strong foundation for research and academia.

### Learning objectives:

- Proficiency in research methodology and scientific investigation techniques
- Knowledge and application of data analysis methods for research purposes
- Understanding of information management principles and practices
- Ability to design and conduct research projects, including data collection and analysis
- Critical thinking and problem-solving abilities to address research challenges

Graduates in the field of scientific assistance have a diverse range of career opportunities available to them. They can pursue roles in research institutions, universities, government agencies, or private organizations. As scientific assistants, they can contribute to cutting-edge research projects, collaborate with renowned experts, and make significant contributions to their respective fields.
