

Erweiterte Einstellungen

Firefox about:config

3 Im Feld **Einstellungsname suchen** die folgende Einstellung **network.http.http3.enabled** eingeben.

network.http.http3.enabled

Nur veränderte Einstellungen anzeigen

network.http.http3.enabled true

4 Betätigen Sie den "Umschalt"-Button um den Wert von **true** in **false** zu ändern.

network.http.http3.enabled false

5 Schließen Sie ihren Browser und starten Sie ihn neu.

Detailed description: The image shows a Firefox browser window with the address bar set to 'about:config'. A search bar at the top contains 'network.http.http3.enabled'. Below it, a list of settings is shown. The first entry is 'network.http.http3.enabled' with a value of 'true'. An orange box highlights the 'Umschalt'-button (a double-headed arrow icon) to the right of this entry. An arrow points from this button to the second entry in the list, which shows the same setting name but with a value of 'false'. A final arrow points from the 'false' value to a text box at the bottom right of the image.
